MANAGEMENT **TEAM**

ORIONEDGE
IT CONSULTING | SERVICES

ORIONEDGE Consulting is an IT initiative of Eram Group of Companies. With the growing dependence on technology, it is with great enthusiasm and the latest technologies in the industry that Eram has established the firm.

ORIONEDGE Consulting provides IT solutions to meet requirements from varied industries, focusing on increased productivity and reduced costs for customers. We take pride in being the fastest growing SAP partner in the Middle East and Asia. Apart from this, ORIONEDGE is focusing on providing consultation and solutions on ERP Software, IT infrastructure development, Web design, E-Commerce and Mobile Application development. With an in-house team of its own, ORIONEDGE provides reliable, efficient and cost-worthy solutions to complex IT scenarios.

ORIONEDGE Consulting aims to add value through domain expertise, measurable IT governance with proven success in rendering world-class deliverables. With its experience over the years and international partnerships, the firm has been able to build a growing trusted client base. We take unto us the ability to deliver high return-on-investment, while continually monitoring project expenses and benefits.

- SAP BASIS Support
- HexaERP
- HexaHRMS
- Other ERP Services

IT Infrastructure

IT Infrastructure

IT infrastructure refers to the composite hardware, software, network resources and services required for the existence, operation and management of an enterprise IT environment. It allows an organization to deliver IT solutions and services to its employees, partners and/or customers and is usually internal to an organization and deployed within owned facilities.

- Networking Services & Solutions
- Security Services & Solutions
- Data Centre Services & Solutions
- Integrated Security Systems
- Communication & Collaboration Systems
- Cloud Computing Solutions
- Artificial Intelligence

Software Development

Software Development

In this digital age, Information Technology is the fuel that powers successful organizations all around the world, propelling them to the attainment of business objectives.

By signing software application development to ORIONEDGE , your organization can get access to state of the art Customized IT practices and a pool of skilled software professionals, while saving on internal resource investment and costs.

Our applications can enable your business to leverage the power of data, enhance operational efficiencies and create synergy between divisions. With improved IT effectiveness, you can enhance customer satisfaction, promote mobility within the workforce and gain a differentiator in the competitive market.

Web Design
Web Application

Web Design

Web design is the process of planning, conceptualizing, and arranging content intended for the Internet. Modern web design goes beyond how things look (aesthetics) to include how things work (functionality). Web design is not limited to websites as it includes other uses such as web apps, mobile apps, and user interface design.

When designing a website, it's imperative to consider both the look and the functionality of the site. Integrating these elements into the design will help maximize the performance of the site, regardless of how performance is measured.

Web Application

A Web application (Web app) is a dynamic application program that is stored on a remote server and delivered over the Internet through a browser interface.

ORIONEDGE offers an entire range of Web application development services to customers marking their inevitable presence with interactive mode in the World Wide Web. We have a team of Web Application Developers who design and develop Web Applications such as Enterprise Level Web Applications, Content Management Systems, e-Commerce Websites and many more.

Mobile App

Mobile App

As per Google, 80% of the users own a smartphone. “More people now shop on Amazon using smartphones and tablets than computers”. Keeping these statistics in mind every business should target the large smartphone user base. Mobile app development can be used to enhance user product experience for smartphone users. Mobile applications are intuitive and accessible.

HexaCart
E-Commerce

E-Commerce / HexaCart

HexaCart is our E-commerce experience which is significant in targeting your customers and engaging with them anywhere and anytime in a better way.

Using standard e-commerce tools, HexaCart platform enables your business to provide a consistent and meaningful shopping experience for the customers. Irrespective of the industry you are in, our e-commerce solution helps in creating contextual, personalized and relevant customer experiences that boost your brand loyalty and increase sales conversions. This stupendous software suite has a ready-to-use code base that can be customized to suit the requirement of any business.
